Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the standard Eurobarometer measures and queried respondents on the following major areas of focus pertaining to public health attitudes, behavior, and prevention: (1) check-up and prevention, (2) oral health, (3) alcohol habits, (4) smoking habits, (5) organ and blood donation, and (6) sport and physical activity. For the first major area of focus, check-up and prevention, respondents confirmed whether in the past 12 months they received certain tests or health check-ups and the motive for this action. The survey asked respondents when their blood pressure was last measured by a health professional, their opinion on what "eating a healthy diet" involves, how much physical activity they had during the last seven days, and whether tobacco smoke from others is harmful to non-smokers. For the second major area of focus, oral health, the survey inquired when respondents last visited a dentist, the number of times they saw a dentist in the last 12 months, the reason they last visited their dentist in the past year or did not visit in the last 2 years, whether a dentist was within 30 minutes from their home or work, if they had access to a dentist's office if care was needed, and where they generally go for dental care. Also, respondents specified the number of times they eat and drink per day, how often they drink or eat certain items, how many natural teeth they have, whether they wear any removable dentures and when they received them, and how often they experienced difficulties due to problems with their teeth and mouth. For the third major area of focus, alcohol habits, respondents were asked whether they consumed any alcoholic beverages and the number of times they had 5 or more drinks on one occasion within the past 12 months, whether they had consumed and how many times they consumed any alcoholic beverages in the last 30 days, and how much they usually consumed during a day when they drank alcoholic beverages. Respondents were asked for their opinion on whether they, or young and heavy drinkers in general, would buy less alcoholic beverages should the price increase by 25 percent, and whether they would buy more should the price decrease by 25 percent. Respondents were also queried about the legal blood alcohol level (BAC) for drivers in their country, after how many alcoholic drinks consumed during 2 hours should a person not drive, and whether the BAC level for young and novice drivers should be 0.2g/l in their country and all 27 European Union member countries. Additionally, respondents shared how often they drive a car themselves, whether they agree with certain statements about specific laws and regulations pertaining to alcohol consumption, whether individuals are responsible enough to protect themselves from alcohol-related harm or whether public authorities have to intervene, and whether consumption of alcoholic beverages can increase the risk of certain health conditions or is a contributory factor in certain social problems. For the fourth major area of focus, smoking habits, the survey interviewed respondents about their smoking status regarding cigarettes, cigars, or a pipe, and whether currently or prior to quitting smoking they tried other tobacco products and how often they used them. Respondents revealed on average how many cigarettes, cigars, or pipes they smoked each day, whether certain factors influenced their choice of cigarettes, and whether smoking is permitted in their household and car. Additionally, respondents noted whether they encountered people smoking inside a drinking or eating establishment in the last 6 months, and how often they were exposed to tobacco smoke indoors at their workplace. The survey also explored whether respondents tried to quit smoking in the last 12 months, how long their most recent attempt lasted and what methods they used, and what motivated them to quit or think about quitting tobacco use in the last 12 months. Respondents were asked whether some types of cigarettes are less harmful than others and whether their harmfulness can be indicated by certain characteristics, whether they had seen advertising for tobacco in the last 6 months, in what manner and how often they purchased tobacco in the past 12 months, and whether they would be in favor of certain measures to control tobacco use. For the fifth major area of focus, organ and blood donation, respondents were asked whether they have discussed human organ donation or organ transplant with their family, their knowledge of regulations in their country regarding the donation and transplanting of human organs, whether they would

donate their own organs or an organ from a close family member after death and if not, why. Additional questions asked respondents whether they have ever given blood and whether blood transfusions are safer now than 10 years ago. For the sixth major area of focus, sports and physical activity, the survey queried respondents on how often, where, and why they participate in exercise or sports, how often they engage in physical activity outside of sports, and the reason or condition that prevents them from participating in sports activities more regularly. Respondents were also asked whether they agreed with certain statements about sports and physical activity, whether they are a member of a club where they participate in sports or other recreational physical activity, and whether they engage in voluntary work that supports sports activities, and if so, the amount of time they spend. Demographic and other background information includes age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or a mobile telephone and other durable goods, difficulties in paying bills, level in society, Internet use, type and size of locality, region of residence, and language of interview.

1.3 Universe

In all, Eurobarometer 72.3 interviewed 30.292 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria), in the remaining Candidate Countries (CC) Croatia and Turkey, as well as in the Former Yugoslav Republic of Makedonia (FYROM) and among the Turkish Cypriot Community (Northern Cyprus). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Cyprus TCC and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 2 to 19, 2009, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition

and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 72.3 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET)

for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 72.3	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W15, W18, W19	grouping candidate/accession countries
W25, W26	grouping member + candidate/accession countries
W81, W82, W84	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to

standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

1.9 Further remarks

Question modules QA (health check-up and prevention), QC (alcohol habits) and QF (sport and physical activity) asked to EU27 only. No data are available for QC8b (non EU27 countries).

The following protocol variables are missing in the data set: P1 - DATE OF INTERVIEW, P2 - TIME OF INTERVIEW BEGINNING, P3 - DURATION OF INTERVIEW, P4 - N OF PERSONS PRESENT DURING THE INTERVIEW and P5 - RESPONDENT COOPERATION.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

EU History	Survey (start)	Country (Sample)	ISO Code Alpha-2	Standard Sample Size	Remarks

Norway		NO	1000		

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category	Party Family
0	(001-099) not affiliated / electoral alliances across "families"
1	(100-199) Communists
2	(200-299) Socialists
3	(300-399) Liberals
4	(400-499) Christian Democrats
5	(500-599) Conservatives
6	(600-699) Extreme Rights / Nationalists
7	(700-799) Regionalists / Ethnic
8	(800-899) Environmental parties
9	(900-949) Agricultural parties
9	(950-989) other special issue parties (e.g. Eurosceptics) and independents
	990 other (spontaneous)
	994 not voting age
	995 empty ballot (blank) or invalid vote
	996 not voted / would not vote
	997 Refused
	998 DK / DK+NA if NA not coded separately
	999 INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																								
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																								

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4977			30292	100.0	100.0
	Sum		30292	100.0	100.0
	Valid Cases		30292		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4977			30292	100.0	100.0
	Sum		30292	100.0	100.0
	Valid Cases		30292		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2012-02-03)			30292	100.0	100.0
	Sum		30292	100.0	100.0
	Valid Cases		30292		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

723 Eurobarometer 72.3

v4

Value	Label	Missing	Count	Percent	Valid Percent
723	Eurobarometer 72.3		30292	100.0	100.0
	Sum		30292	100.0	100.0
	Valid Cases		30292		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania; 30: Turkey; 31: Croatia; 32: Cyprus (CY-TCC); 33: Macedonia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania
- 31 Turkey
- 32 Croatia
- 33 Cyprus (CY-TCC)
- 34 Macedonia (FYROM)

Note:

Use of weighting factor W1 (V8) is optional.

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v14 - W5 WEIGHT EU6

W5 WEIGHT EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

v15 - NATION GROUP EU9

NATION GROUP EU9

NATION GROUP EU9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries.

0 Other

1 EU9

Note:

Use of weighting factor W6 (V16) is mandatory.

v22 - W9 WEIGHT EU12+

W9 WEIGHT EU12+

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

v23 - NATION GROUP EU NMS 3

NATION GROUP EU NMS 3

NATION GROUP EU NMS 3 only refers to the three new members as of January 1995: Finland, Sweden and Austria.

0 Other

1 EU NMS 3

Note:

Use of weighting factor W10 (V24) is mandatory.

v40 - W22 WEIGHT EU27

W22 WEIGHT EU27

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

v41 - NATION GROUP EU27 + HR

NATION GROUP EU27 + HR

NATION GROUP EU27 + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria and the candidate country Croatia. Turkey, the Turkish Cypriot Community and the Former Yugoslav Republic of Macedonia are excluded.

v48 - W26 WEIGHT EU27 + TR + HR + MK

W26 WEIGHT EU27 + TR + HR + MK

WEIGHT EU27 + TR + HR + MK includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, the remaining candidate countries Turkey and Croatia and adds the Former Yugoslav Republic of Macedonia. The Turkish Cypriot Community is excluded from calculation. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU27 + TR + HR + MK (V47). The post-stratification weighting factors are included.

v49 - NATION GROUP EU27 + TR + HR + CY-TCC + MK

NATION GROUP EU27 + TR + HR + CY-TCC + MK

NATION GROUP EU27 + TR + HR + CY-TCC + MK includes all participating countries.

1 EU27 + TR + HR + CY-TCC + MK

Note:

Use of weighting factor W27 (V50) is mandatory.

v50 - W27 WEIGHT EU27 + TR + HR + CY-TCC + MK

W27 WEIGHT EU27 + TR + HR + CY-TCC + MK

WEIGHT EU27 + TR + HR + CY-TCC + MK is provided for analysing all participating countries (samples) in total, including the remaining candidate countries Turkey and Croatia, plus the Turkish Cypriot Community and the Former Yugoslav Republic of Macedonia. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the total population surveyed in this wave (V49). The post-stratification weighting factors are included.

v51 - NATION GROUP NON EURO ZONE 2007

NATION GROUP NON EURO ZONE 2007

NATION GROUP NON EURO ZONE 2007 refers to the group of countries which did not introduce the EURO up to January 1, 2007 (Denmark, United Kingdom, Sweden, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Bulgaria, Romania).

v52 - W28 WEIGHT NON EURO ZONE 2007

W28 WEIGHT NON EURO ZONE 2007

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2007. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group.

v53 - NATION GROUP EURO ZONE 2009

NATION GROUP EURO ZONE 2009

NATION GROUP EURO ZONE 2009 separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009.

v54 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v55 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

v97 - QA1 HEALTH CHECK-UPS: BLOOD PRESSURE TEST

Q.A1

ASK Q.A ONLY IN EU27

I am going to read out a series of possible tests or health check-ups. For each of them, please tell me if you had one in the last 12 months, whether or not as part of any treatment.

(IF YES)

Was it on your own initiative, at a doctor's initiative or as part of a screening programme?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

v125 - QB2 DENTIST VISITS - PAST 12 MONTHS

Q.B2

ASK Q.B2 AND Q.B3 IF "VISIT A DENTIST WITHIN THE PAST YEAR", CODE 1 IN Q.B1 - IF Q.B1=3-5 GO TO Q.B4 - OTHERS GO TO Q.B5

About how many times in the past 12 months have you seen a dentist?

(WRITE DOWN - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

1 Once

50 50 times

97 Refusal

98 DK

99 Inap. Did not visit a dentist within the past year or DK in Q.B1 (not coded 1 in V124)

Note:

Original code "98" recoded to "97".

Original code "99" recoded to "98".

Actual number is coded.

v126 - QB2 DENTIST VISITS - PAST 12 MONTHS (REC)

Q.B2 Times visited a dentist within the past year - RECODED

- 1 Once
- 2 2 times
- 3 3 times
- 4 4 times or more
- 7 Refusal
- 8 DK
- 9 Inap. Did not visit a dentist within the past year or DK in Q.B1 (not coded 1 in V124)

Derivation:

This variable groups answers to question Q.B2/V125.

Note:

See V125 for complete question text.

v127 - QB3 DENTIST VISIT - REASON

ASK Q.B2 AND Q.B3 IF "VISIT A DENTIST WITHIN THE PAST YEAR", CODE 1 IN Q.B1

Q.B3

What was the reason for the last visit to the dentist?

(READ OUT – ONE ANSWER ONLY)

- 1 Check-up, examination or cleaning
- 2 Routine treatment
- 3 Emergency treatment
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. Did not visit a dentist within the past year or DK in Q.B1 (not coded 1 in V124)

Note:

Original code "3" recoded to "7".

Original code "4" recoded to "8".

v128 - QB4 DENTIST VISIT - REASON WHY NOT

Q.B4

ASK Q.B4 IF "DID NOT VISIT A DENTIST DURING THE PAST TWO YEARS", CODE 3 TO 5 IN Q.B1 - OTHERS GO TO Q.B5

What was the main reason you did not visit a dentist in the last two years?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 It is too expensive
- 2 You don't want to spend money on dental care
- 3 You are afraid or you don't like dentists or dental hygienists
- 4 You are too busy
- 5 Your dental problem is not serious enough
- 6 Dental office too far away
- 7 You have no teeth or you have false teeth
- 8 Physical problems preventing you from going
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)
- 98 DK
- 99 Inap. Did visit a dentist during the past two years or DK in Q.B1 (not coded 3 to 5 in V124)

Note:

v132 - QB8 EATING/DRINKING - OCCASIONS PER DAY

Q.B8

How many eating / drinking occasions do you have per day even in small quantities?

(WRITE DOWN – "00" IS NOT ACCEPTED – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

1 Once

50 50 times

97 Refusal

98 DK

Note:

Original code "98" recoded to "97".

Original code "99" recoded to "98".

Actual number is coded.

v133 - QB8 EATING/DRINKING - OCCASIONS PER DAY (REC)

Q.B8 Number of eating or drinking occasions per day - RECODED

- 1 Less than 3 times
- 2 3 times
- 3 4 times
- 4 5 times
- 5 6 times or more
- 7 Refusal
- 8 DK

Derivation:

This variable groups answers to question Q.B8/V132.

Note:

See V132 for complete question text.

v142 - QB12 DENTAL HEALTH - REMOVABLE DENTURE PERIOD

DO NOT ASK Q.B11 AND Q.B12 IF "HAS ALL HIS NATURAL TEETH", CODE 1 IN Q.B10

Q.B12

ASK Q.B12 IF "WEAR ANY REMOVABLE DENTURE", CODE 1 IN Q.B11 - OTHERS GO TO Q.B13

When did you get your last removable denture?

(READ OUT – ONE ANSWER ONLY)

- 1 1 to 2 years ago
- 2 3 to 4 years ago
- 3 5 to 9 years ago
- 4 10 years ago and over
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. Does not wear removable denture, DK or Refusal in Q.B11 (not coded 1 in V141)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v151 - QC1B DRINKING ALCOHOL - 5 OR MORE DRINKS

ASK Q.C ONLY IN EU27

Q.C1B

ASK Q.C1B TO Q.C3 IF "YES", CODE 1 in Q.C1A – OTHERS GO TO Q.C4

How often in the past 12 months have you had 5 or more drinks on one occasion?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Several times a week
- 2 Once a week
- 3 Once a month
- 4 Less than once a month
- 5 Never
- 6 DK/Refusal
- 9 Inap. Not any alcoholic beverage during last 12 months or DK/Refusal in Q.C1A (not coded 1 in V150)
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

v158 - QC6 LEGAL BAC FOR CAR DRIVERS

ASK Q.C ONLY IN EU27

Q.C6

What is the legal blood alcohol level (BAC) allowed for car drivers in (OUR COUNTRY)?
(WRITE DOWN – IF "DK", CODE '99.99')

0 0,00 g/l

5 5 g/l

9 DK

99 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Original code "99.99" recoded to "9".

Actual number is coded.

Last trend: EB66.2, Q.B15A

v159 - QC6 LEGAL BAC FOR CAR DRIVERS (REC)

Q.C6 Legal blood alcohol level (BAC) allowed for car drivers - RECODED

- 0 00,00 g/l
- 1 From 0,01 - 0,59 g/l
- 2 From 0,60 - 1,00 g/l
- 3 More than 1,00 g/l
- 8 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable collapses answers to Q.C6/V158 into four categories.

Note:

See Q.C6/V158 for complete question text.

v161 - QC7 NOT DRIVE IF ALCOHOL DRINKS IN 2 HRS

ASK Q.C ONLY IN EU27

Q.C7

After how many alcoholic drinks consumed during 2 hours beer, wine, spirits, cider or other alcoholic beverages) should a person NOT drive?

(WRITE DOWN - IF "NONE" CODE '00' - IF "IT DEPENDS" CODE '98' - IF "DK", CODE '99')

0 None

30 30 drinks

98 It depends

99 DK

999 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Actual number is coded.

v162 - QC7 NOT DRIVE IF ALCOHOL DRINKS IN 2 HRS (REC)

Q.C7 Person should not drive after consuming n alcoholic drinks during two hours - RECODED

- 0 None
- 1 1 alcoholic drink
- 2 2 alcoholic drinks
- 3 3 alcoholic drinks
- 4 4 alcoholic drinks
- 5 5 alcoholic drinks and more
- 6 It depends
- 8 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable groups answers to question Q.C7/V161.

Note:

See Q.C7/V161 for complete question text.

v164 - QC8 DRIVING A CAR - FREQUENCY

ASK Q.C ONLY IN EU27

Q.C8

How often do you yourself drive a car?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 At least once a week
- 2 At least once a month
- 3 At least once a year
- 4 Less often
- 5 Do not drive (SPONTANEOUS)
- 6 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v197 - QD4A SMOKING HABITS: CIGARETTES PER DAY

ASK Q.D3A IF "SMOKE AT THE PRESENT TIME", CODE 1 IN Q.D1

Q.D4A

ASK Q.D4A IF "CIGARETTES SMOKER", CODE 1 OR 2 IN Q.D3A_1 OR CODE 1 OR 2 IN Q.D3A_2 - IF Q.D3A_3=1,2 GO TO

Q.D4B - IF Q.D4A_4=1,2 GO TO Q.D4C - OTHERS GO TO Q.D5

On average, how many cigarettes do you smoke each day?

(WRITE DOWN - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0 Less than one

1 One cigarette

94 94 cigarettes

97 Refusal

98 DK

99 Inap. Does not smoke cigarettes in Q.D3A (not coded 1 or 2 in V188 and V189)

Note:

Actual number is coded.

Original code "98" recoded to "97".

Original code "99" recoded to "98".

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v198 - QD4A SMOKING HABITS: CIGARETTES PER DAY (REC)

Q.D4A Cigarettes each day - RECODED

- 0 Less than 1 cigarette
- 1 From 1 to 5 cigarettes
- 2 From 6 to 10 cigarettes
- 3 From 11 to 20 cigarettes
- 4 21 cigarettes or more
- 7 Refusal
- 8 DK
- 9 Inap. Does not smoke cigarettes in Q.D3A (not coded 1 or 2 in V188 and V189)

Derivation:

This variable collapses answers to Q.D4A/V197 into five categories.

Note:

See Q.D4A/V197 for complete question text.

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v199 - QD4B SMOKING HABITS: CIGARS PER DAY

ASK Q.D3A IF "SMOKE AT THE PRESENT TIME", CODE 1 IN Q.D1

Q.D4B

ASK Q.D4B IF "CIGARS SMOKER", CODE 1 OR 2 IN Q.D3A_3 - IF Q.D3A_4=1,2 GO TO Q.D4C - OTHERS GO TO Q.D5

On average, how many cigars do you smoke each day?

(WRITE DOWN - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Less than one
- 1 One cigar
- 30 30 cigars
- 97 Refusal
- 98 DK
- 99 Inap. Does not smoke cigars in Q.D3A (not coded 1 or 2 in V190)

Note:

Actual number is coded.

Original code "98" recoded to "97".

Original code "99" recoded to "98".

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v200 - QD4B SMOKING HABITS: CIGARS PER DAY (REC)

Q.D4B Cigars each day - RECODED

- 0 Less than 1 cigar
- 1 From 1 to 5 cigars
- 2 6 cigars or more
- 7 Refusal
- 8 DK
- 9 Inap. Does not smoke cigars in Q.D3A (not coded 1 or 2 in V190)

Derivation:

This variable collapses answers to Q.D4B into three categories.

Note:

See Q.D4B for complete question text.

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v201 - QD4C SMOKING HABITS: PIPES PER DAY

ASK Q.D3A IF "SMOKE AT THE PRESENT TIME", CODE 1 IN Q.D1

Q.D4C

ASK Q.D4C IF "PIPE SMOKER", CODE 1 OR 2 IN Q.D3A_4 - OTHERS GO TO Q.D5

On average, how many pipes do you smoke each day?

(WRITE DOWN - IF "REFUSAL" CODE '98' - IF "DK" code "99")

- 0 Less than one
- 1 One pipe
- 30 30 pipes
- 97 Refusal
- 98 DK
- 99 Inap. Does not smoke pipes in Q.D3A (not coded 1 or 2 in V191)

Note:

Actual number is coded.

Original code "98" recoded to "97".

Original code "99" recoded to "98".

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v202 - QD4C SMOKING HABITS: PIPES PER DAY (REC)

Q.D4C Pipes each day - RECODED

- 0 Less than 1 pipe
- 1 From 1 to 5 pipes
- 2 6 pipes or more
- 7 Refusal
- 8 DK
- 9 Inap. Does not smoke pipes in Q.D3A (not coded 1 or 2 in V191)

Derivation:

This variable collapses answers to Q.D4C into three categories.

Note:

See Q.D4C for complete question text.

The questionnaire interviewer coding instruction refers to REFUSALS while the original dataset documents the corresponding value as IT DEPENDS. The same is true for the official reports.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v211 - QD9 PASSIVE SMOKING AT INDOOR WORKPLACE

Q.D9

ASK Q.D9 ONLY IF "CURRENTLY WORK", CODE 5 TO 18 IN D.15A - OTHERS GO TO Q.D10

How often are you exposed to tobacco smoke indoors at your workplace?

(READ OUT – ONE ANSWER ONLY)

- 1 Never or almost never
- 2 Less than 1 hour a day
- 3 1 - 5 hours a day
- 4 More than 5 hours a day
- 5 Not relevant (don't work or don't work indoors) (SPONTANEOUS)
- 6 DK
- 9 Inap. Do not currently work in D.15A (not coded 5 to 18 in V181)

Note:

Please notice that in accordance with the filter instruction respondents who currently do not work are coded 9 "Inap. (not 5 to 18 in V181)" and are not included in code 5 "Not relevant (don't work or don't work indoors)".

v213 - QD11 QUIT SMOKING ATTEMPT - PERIOD

ASK Q.D10 TO Q.D12A IF "SMOKERS", CODE 1 IN Q.D1

Q.D11

ASK QD11 TO QD12A IF "HAS TRIED QUITTING IN THE LAST 12 MONTHS", CODE 1, 2 OR 3 IN Q.D10 – OTHERS GO TO Q.D12B

Thinking about the last time you attempted to give up smoking, how long did this attempt last?
(SHOW CARD – READ OUT – ONE ANSWER O)

- 1 Less than a day
- 2 Between 1 and 6 days
- 3 Between 1 and 8 weeks
- 4 Over two months
- 5 DK
- 9 Inap. Never tried to quit smoking in last twelve months or DK in Q.D10 (not coded 1 to 3 in V212)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Last trend: EB66.2, Q.B23

v282 - QF1 SPORT ACTIVITY - FREQUENCY

Now let's talk about another topic.

Q.F1

ASK Q.F TO EU27

How often do you exercise or play sport?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 5 times a week or more
- 2 3 to 4 times a week
- 3 1 to 2 times a week
- 4 1 to 3 times a month
- 5 Less often
- 6 Never
- 7 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Please notice partly incorrect coding and labeling of items in the basic questionnaire.

v284 - QF2 PHYSICAL ACTIVITY - FREQUENCY

ASK Q.F TO EU27

Q.F2

And how often do you engage in a physical activity outside sport such as cycling or walking from a place to another, dancing, gardening...?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 5 times a week or more
- 2 3 to 4 times a week
- 3 1 to 2 times a week
- 4 1 to 3 times a month
- 5 Less often
- 6 Never
- 7 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v312 - QF5 SPORT ACTIVITY - REASON WHY NOT

Q.F5

ASK ALL IN EU27

From the following reasons, what is currently preventing you the most from practicing sport more regularly?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 You do not have the time
- 2 It is too expensive
- 3 You do not like competitive activities
- 4 There are no suitable sports infrastructures close to where you live
- 5 A disability or illness prevents you from doing sport
- 6 You do not have friends to do sports with
- 7 Other (SPONTANEOUS)
- 8 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v324 - QF8 VOLUNTARY WORK IN SPORT - ENGAGED

ASK Q.F TO EU27

The next questions concern volunteering in sport. By volunteering in sport we mean voluntary work for which you do not receive any payment except to cover expenses, e.g. organising or helping to run an event, campaigning/raising money/providing transport or driving/ taking part in a sponsored event/ coaching, tuition, mentoring etc. This does not include time spent solely supporting the sporting activity of your own family members.

Q.F8

Do you engage in voluntary work that support sporting activities?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v327 - D7 MARITAL STATUS (REC)

D.7 Marital Status (RECODED)

- 1 Married or remarried (codes 1 to 4)
- 2 Single living with a partner (codes 5 to 8)
- 3 Single (codes 9 and 10)
- 4 Divorced or separated (codes 11 and 12)
- 5 Widow (codes 13 and 14)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

v328 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Refusal
- 5 5 years
- 71 71 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Actual number is coded.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Last trend: EB72.2, D.8

v329 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

v331 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB72.2, D.11

v332 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v336 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40AR HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40A/V335.

Note:

See V335 for complete question text.

v341 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 27 Twentyseven

Derivation:

This variable summarizes V335, V337 and V339.

Note:

See V335, V337 and V339 for complete question text.

v357 - D62 INTERNET USE FREQ: AT HOME

D.62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D.62_1 You use the Internet at home, in your home

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Once or twice a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Note:

Last trend: EB72.2, D.62

v359 - D62 INTERNET USE FREQ: SOMEWHERE ELSE

D.62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D.62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Once or twice a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Note:

Last trend: EB72.2, D.62

	Sum		30292	100.0	100.0
	Valid Cases		1008		

v373 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately.

Last trend: EB72.2, P.6

v373, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		224	16.5	16.5
2	Urban		668	49.3	49.3
3	Metropolitan		462	34.1	34.1
99	Inap. (not 9 or 10 in V6)	M	0	0.0	
	Sum		1354	100.0	100.0
	Valid Cases		1354		

v374 - P6 SIZE OF COMMUNITY - GREECE

P.6_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban

v443 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13_BE Language of questionnaire: Belgium

- 1 French
- 2 Dutch
- 9 Inap. not BE (not coded 2 in V6)

Note:

Last trend: EB72.2, P.13

v443

Value	Label	Missing	Count	Percent	Valid Percent
1	French		514	1.7	51.3
2	Dutch		487	1.6	48.7
9	Inap. (not 2 in V6)	M	29291	96.7	
	Sum		30292	100.0	100.0
	Valid Cases		1001		

v444 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. not LU (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inverted. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion and rough plausibility regarding the regional distribution of questionnaire language versions is recovered. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire. Starting with 72.3 the total proportion of language versions is inverted again with up to about 75% of French questionnaires, but maintaining rough plausibility regarding the regional distribution. Starting with Eurobarometer 72.2 data on the questionnaire language version (P13) are not anymore regularly made available for all waves.

Last trend: EB72.2, P.13

v444

Value	Label	Missing	Count	Percent	Valid Percent
